NEWS RELEASE

City of Falls Church Begins Summer Street Paving Project

The City of Falls Church Department of Environmental Services began its annual summer paving project June 17. To maintain and improve the safety of City streets, a paving project is planned every summer. Streets that will be paved are prioritized based on need.

The list of streets and the tentative paving schedule are listed below. The list will be updated on the City web site www.fallschurchva.gov/ as streets are completed. There may be some temporary traffic disruptions in the neighborhood where the paving work is being done, but one lane will always be available and all driveways will remain accessible. Residents of neighborhoods where the work is planned will be notified in advance and signs will be posted where the work will occur.

For more information contact Tim Geis, tgeis@fallschurchva.gov or 703-248-5281 (TTY 711).
